

Idegeia

Mental Energy and It's Uses

What is Idegeia?

A construct of human thought expressed as energy.

Why is Idegeia important to Eonteous?

Eonteous desires to help people who are struggling to understand how to allocate their time and effort towards their tasks, goals, and objectives. Idegeia allows our users to visually understand what things they should focus their time and energy on and what things they should focus on later.

On the flip side, it is important to understand one's limitations. Although many of us believe ourselves to have unlimited energy we simply do not and can end up harming ourselves. Hopefully, with the creation of Idegeia, we can reduce self-inflicted harm and increase over all success rates.

Idegeia and its components

Anteosine

Mycorrosine

Saprosine

Anteosine

Anteosine powers thoughts focused on the physicality of life.

Anteosine or “Anteo” for short, is associated with with subjectivity, abstraction, heuristics, and will power. Most importantly, Anteosine exists in the subconscious.

Mycorrosine

Mycorrosine powers thoughts focused on the practical decision-making part of life.

Mycorrosine or “Mycorr” for short, is associated with objectivity, learning, non-emotionality, and straightforwardness. Mycorrosine exists in the conscious.

Saprosine

Saprosine will be a new concept for many users and for most. For now, read it and try to understand the concept.

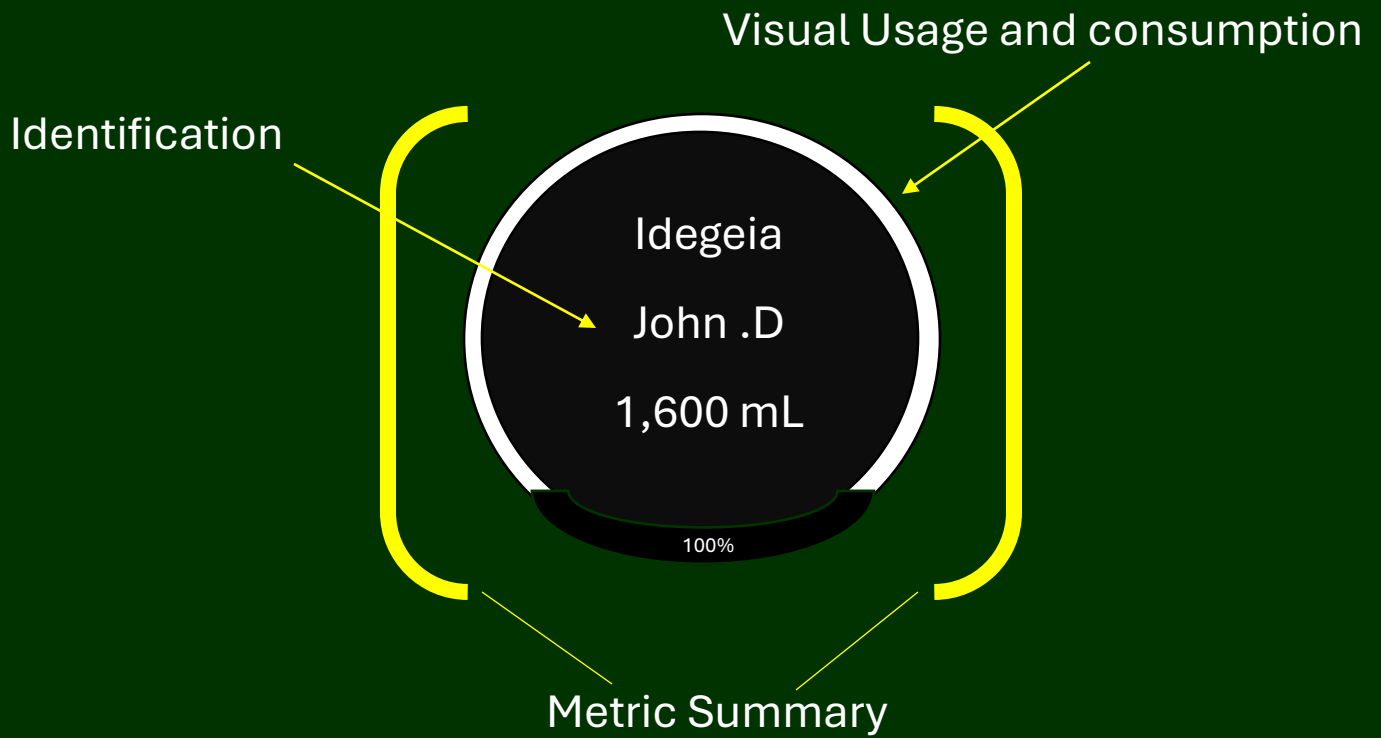

Saprosine

Saprosine powers thoughts focused on emotional parts of life.

Saprosine is associated with sensations, instincts, feelings, and undocumented experiences/behaviors. Saprosine exists in the hyperconscious.

*As with everything, concepts, ideas, and information are subject to change. *

First Looks

Anteosine

Consumption bar: 533.3333 mL

Mycorrosine

Consumption bar: 533.3333 mL

Saprosine

Consumption bar: 533.3333 mL

Idegeia and mL

As you know, “mL” stands for milliliter. I’m sure you’re wondering why we used mL to describe Idegeia. We’ll do our best to explain it.

First, we wanted to add some realism to Idegeia. By using mL it allows users to be able to quickly grasp what is “a lot” and what is “a little”. We want fast information consumption, interpretation, then action.

Lastly, anteo, mycorr, and sapro added together gives the total of Idegeia. **So, for our first look, we see there is 1,600 mL. John H. must have 533.3333 mL per component.** Since this is an example, in real life you probably would never see this.

How is mL determined?

Each user is unique, and we wanted to express that by using mL. It allows company members to dish out information quickly and interpret that information quickly. In order to establish how much Idegeia a person possesses we have to run some assessments.

Typically, the assessments are tasks that are completed by users. Although there are many components to the assessment, the following have the most impact:

1. Time of Completion
2. Height
3. Weight
4. Motif: *P.G.D*
5. Essance: *M.G.D*

Summary

In conclusion, Idegeia is designed to make it easier for users to see how to navigate and take on challenges they face in their everyday life. Hopefully this helps. If you have any questions or suggestions, please email us at eonteous@gmail.com. Thank you for your time!
